Date of Birth : 22.03.2005

SUMMARY

As a first-year Computer Engineering student at Kadir Has University, I am a tech enthusiast focused on building a strong foundation in software development. Currently developing my skills in Python and C++, I have a deep interest in exploring the world of Artificial Intelligence. I am a motivated learner, eager to take on introductory projects and gain hands-on experience in modern technology.

PROJECTS AND RESPONSIBILITIES

Bilim ve Etik Arasındaki Araf (Published Article) *December 2025*
Authored a research article for CoreMag regarding the ethical dilemmas of animal experimentation. Conducted extensive literature review on the historical and modern perspectives of bioethics, analyzing the balance between scientific advancement and animal welfare. Gained experience in academic research, critical thinking, and synthesizing complex information for a general audience.

Social Responsibility Project *March 2025-May 2025*
As a social responsibility project, I worked at the Şişli Food Bank, assisting citizens seeking aid with food credit counts, identifying their needs, and transporting supplies. I also helped the staff with food counting and etc.

EDUCATION

Kadir Has University *Istanbul, Turkey*
B.S. in Computer Engineering *2024 - 2028 (Estimated)*

Kırımlı Fazilet Olcay Anatolian High School *Istanbul, Turkey*
High School Diploma *2019 - 2023*

· GPA: 89.9/100

TECHNICAL SKILLS

- **Programming Languages:** Python (Basic), C++ (Basic).
- **Interests:** Artificial Intelligence, Machine Learning, Esports, Cinema.
- **Languages:** Turkish (Native), English (B2).
